waterproofing Pg 1 of 2

FW: basement drain

To John Shams (scorpionfitnessinfo@gmail.com)

John, As we had previously discussed you were to schedule Rand for a Meeting earlier this week to discuss the drain issue. Please let me know where that stands. Also please let me know the names of all contractors who are working on site so I can verify with my insurance agent if they are approved to work in the building. Thank you for your cooperation.

Subject: Fwd: basement drain

John, Based on the significant rainfall this weekend and the water issue as shown in your pictures it is important that we initiate the plan as outlined in my August 2, 2018 email (see below). The drains should eliminate the water issue. As indicated the work would take approx. 1 week. We would like to commence the work this week. Please get back to me at your earliest convenience.
Thanks

Hi Chuck ,

Let's hold off on opening the walls at the moment until it rains. There are some other solutions we are exploring that are less invasive that we think should solve the problem.

John, see sketch and description. Please forward to Rand and ask for times they could meet on site so we can get this underway.
Thanks

James, As I indicated earlier today John would not let us in the premises but he did say that there are **no leaks** in the premises.
